SUMMARY:

Problem solver, troubleshooter, organized, critical thinker, team player, hard worker, quick learner, friendly, written and verbal communicator. I work to understand how people interact with their technology so that I can help them with any problem they may encounter.

TECHNICAL SKILLS: Computer/Networking Troubleshooting (LAN/VPN), Computer security, Technical Support (computers, phones, tablets, printers, etc.), Windows (XP, Vista, 7, 8, 10), macOS, Microsoft Office, Object Oriented Programming, HTML, CSS, ReactJS, Node.js, Git, Java, JavaScript, SQL, Project Management, Website creation/management

PROJECT EXPERIENCE:

UMASS COMEDY LEAGUE - Amherst, MA

3/18 – 5/18

Alumni Application

https://github.com/ThePeacockEsquire/actual_ucl_alumni

- Worked alone to create an application that parses through data from a Google Spreadsheet and displays them in an easy-to-use list where users can navigate through traditional name search, by troupe, or by personalized nickname
- Created entire project using ReactJS, JavaScript, Node.js, Bootstrap, Git, Node.js, HTML, and CSS.

Website Manager

8/16 – 5/18

www.umasscomedyleague.com

- Built and manage the website for umbrella organization UMass Comedy League
- Created with WordPress using custom HTML and CSS as well as utilizing SEO and modern themes.

UNIVERSITY OF MASSACHUSETTS - Amherst, MA

1/17 – 5/17

Web Programming

<https://github.com/poddarh/nectarine/>

- Developed a class-awarded application that allowed students to quickly access Google Drive and Dropbox files on our site using our app by scanning a QR code.
- Setup project, fixed merge errors, implemented contact and about pages, and general application appearance tweaks using Bootstrap, Node.js, React, Mongo DB, HTML, CSS, and JavaScript.

EXPERIENCE:

ENTERPRISE PEAK - Chicago, IL

7/18 – Present

Data Support Analyst

- Assist Associates by providing Quality Assurance (QA) checks on work done by new employees.
- Wrote and tested scenarios for company's proprietary software.
- Create complex Boolean search strings to identify candidates with highly specialized skill sets.
- Modify/Clean PostgreSQL database to correct information in the database or to update existing records outside of the database by utilizing custom SQL scripts.
- Daily responsibilities involve database backup, utilizing proprietary software to identify ideal candidates by their resume for specific job requisitions across multiple domains (data science, software engineering/architecture, life sciences, and enterprise software), and contacting candidates via email.

PATHLIGHT - Hadley, MA

1/17 – 11/17

Digital Media Consultant

- Created, edited, and produced interviews and footage together for web, events, and social media platforms using a Canon T5i DSLR, Adobe Premiere, and Adobe After Effects.
- Flexible scheduling, client communicating, project and time management, worked remotely

Video/Communications Intern

- Coordinated with Digital Media Specialist to develop video content for web, social media and the occasional organization-wide event.
- Wrote social media and blog posts to accompany the video content across Facebook, Twitter and LinkedIn as well as the Pathlight website.

IMPROVBOSTON - Cambridge, MA

5/17 – 9/17

Operations Intern

- Reported to Associate Producer, was an integral part of day-to-day operations for theater.
- Maintained ticketing requests, studied trends, oversaw general upkeep and organization of physical space. Worked independently most times.
